

Czech Unipetrol's new 270,000 mt/year high density polyethylene unit to be ready by December

Platts.com, 19th July 2018

Czech petrochemicals producer Unipetrol said Friday it expected to complete the construction of its new 270,000 mt/year capacity high density polyethylene unit in Litvinov by the end of this year.

"Project progress is approaching 88% completion," Unipetrol said. "Mechanical completion is expected in December 2018."

The project, called PE3, was originally scheduled for completion in mid-2018.
