

Iran's Jam Petrochem to shut HDPE/LLDPE unit in Aug for 1-month maintenance

Platts.com, 6th June 2018

Iran's Jam Petrochemical will shut its 330,000 mt/year high density/ linear low density polyethylene swing plant in Asaluyeh in August for a month of maintenance, a company source said Wednesday.

Market sources said that this was not expected to affect the market as the maintenance was scheduled.
